SKU	OMEG120
Case quantity	12 bottles
Case shipping weight	4.25 lbs.
Case shipping size	10 1/2" L x 8" W x 4 7/8" H

#### Licaps® Information and Facts for Your Vets

- Licaps® is a new technology being used due to its unique delivery system and highly improved bioavailability with oil-based nutrients like Omega-3 oils.
- Licaps® are two-piece capsules that have been specially designed to be sealed for secure containment of liquids and semi-solids without banding.
- They are specifically designed for maximum bioavailability and absorption rate over tablets, capsules and softgels.
- Because oil soluble ingredients will not mix with the water in the body, oil-based nutrients are not easily absorbed. Licaps® employs a self-emulsifying delivery system, so the pet gets more of the nutritional benefit they need from the ingredients.
- The pet is also more willing to consume the Licap® since it tastes and smells like a treat, due to the special coating applied after filling.
- Licaps® are preservative, starch and gluten-free.
